## Third Gulch-Pipeline

This trail is the fastest way to hike Pipeline, and the easiest. The climb on Third Gulch is fairly mild. Pipeline offers some steeper sections and two creek crossings. The top end of Pipeline has the steepest sections of this entire hike. After turning around the trail is all downhill to the parking area. Pipeline has some rockier single track that gives it some more interest. Third Gulch is straightforward double track all the way to the end. With less time on your hands this is a great hike to get right to the point in Eagle Ranch.
